

Trends through New Season

Though there are variables, the Framing trade generally sees upcoming new products and trends start in the Autumn of each year - they closely monitor and reflect our innate and sometimes evolutionary changes in both Season, fashion and often, the general mood of our times. This year we have seen an expansion on the year before, with more mouldings reflecting different textures than perhaps we have seen previously. Of particular note to us are a few ranges of these frames made from a veneer of real stone, and also a marble effect - both making excellent frames for kitchens or bathrooms - and they make wonderful mirrors too. We also have an excellent selection of frames with the impression of 'stitching' along the moulding, as well as the beautiful quilted/sateen textures emulating bridal wear - obviously for brides, but also for other special occasions.

Framing your Creative Ideas - Specialised Framing (Box Frames, Shadow Boxes, Multi-Aperture Framing and Individually made Mirrors)

We specialise in making things individually just for you - protecting and framing projects of a creative nature and design. Tom spends time with you to evaluate your needs and requirements, working out how to help you both protect and present your individual works. There has been a sea change culturally as many of us are now making beautiful creations of Art and Craftwork, - we are now looking at the potential of framing a huge variety of different subjects, objects and creations.

Manuscripts, Spoons, Baby Memorabilia, Sportswear we can even frame your Bridal dress, or bouquet! We take time to listen to your requirements and do all we can to match the product to your budget. Anything can be framed, so why not ask Tom if he can help with your specific gift idea or project ... visit our website ... or contact us directly to talk things over or arrange a visit to see us here at the workshop.

Many of you may have been watching the acclaimed BBC series, 'Victoria'. We expect to see a 'Victoriana' influence coming into the framing scene and Tom has some great ideas to help you explore this theme for your home. We sell a modern version of the Edwardian/Victorian Picture Rail, a feat of modern engineering which makes for great wall displays, very discreetly and affordably.
